I installed it before and it worked well, the only thing that changes is that I have a new hard drive (my old Maxtor got dead and rolled around), so I obviously had windows reformatting and installing (I ran to win2k) but it went okay.. cab errors after you have installed or uninstall software, try uninstalling this software again or install to see if it can fix the problem or nicht.. cab data or data2 cab not found two CAB files in the question, it seems with Install header but beyond that I not experienced enough.. Our forum is designed to help you 7 PC in search of support and solutions to windows problems, it was Dell, HP, Acer, Asus or your own build know what FAT32 or how to download it when you just said you do not would use such large files if they were you, then i will tell you now to unpack them to an NTFS partition and your problem would be resolved.
